Senachwine Feasibility
Task C: Woody Cover, Riparian Width
Draft 1: 6.18.2008
A. Phillips, Illinois State Geological Survey

Riparian Width from BHI
Woody Cover from CSI

- <5 m, 0-10% woody
- 5-10 m, 0-10% woody
- 10-15 m, 0-10% woody
- >20 m, 0-10% woody
- <5 m, 11-25% woody
- 5-10 m, 11-25% woody
- 10-20 m, 11-25% woody
- >20 m, 11-25% woody
- <5 m, 26-50% woody
- >20 m, 26-50% woody
- <5 m, 51-75% woody
- 5-10 m, 51-75% woody
- >20 m, 51-75% woody
- < 5m, 76-100% woody
- 5-10m, 76-100% woody
- > 20m, 76-100% woody

Hydric Soils Prioritized

- 1: Not wetland, < 1000 ft from stream
- 2: Wetland, < 1000 ft from stream
- 3: Wetland, > 1000 ft from stream
- 4: Not wetland, > 1000 ft from stream

Task A

- Quad II (low BHI & CSI)
- Mass Wasting Observed
- CEM Stage III
- Center of Assessed Reaches
- channeled_cartographic
