**Averages based on 1971-2000 data.**

Temp midnight-midnight, Precip and Snow at 7 am LST

M = Missing

**WEATHER TYPES:**

R = Rain      Z = Freezing rain/drizzle      D = Dust  
 L = Drizzle    IP = Ice pellets (sleet)            H = Haze  
 S = Snow      A = Hail                                BS = Blowing snow  
 T = Thunder   F = Fog                        RW = Rainshower    SW = Snowshower

**PRECIP INTENSITY**

- Light      Precip amount "T" =Trace  
 Moderate  
 + Heavy

**DEGREE DAYS** Heat and Cool base 65F. Corn Growing base 50F, ceiling 86F. Heating DD season July-June. Cool and Corn DD season January-December.

# Champaign-Urbana Weather Highlights – November 2004

## ILLINOIS STATE WATER SURVEY

Jim Angel, State Climatologist  
2204 Griffith Drive  
Champaign, IL 61820  
wxobsrvr@sws.uiuc.edu

**Temperature** – no daily records were set this month. However, the average monthly maximum temperature of 52.8 degrees is the 24<sup>th</sup> warmest for November since 1888. The average monthly minimum temperature of 37.6 degrees is the 9<sup>th</sup> warmest and the average monthly mean temperature of 45.2 degrees is the 11<sup>th</sup> warmest for November since 1888.

**Precipitation** – no daily records were set this month. However, the 5.16 inches of precipitation made this the 7<sup>th</sup> wettest November since 1888.

### Major change in September

Precipitation and snowfall are no longer midnight-midnight. They are now 7am-7am, meaning that the precipitation for a day represents the amount observed at 7am. Operationally, the precipitation and snowfall observations were always made at 7am and then adjusted to midnight-midnight using recording gages. This process was cumbersome and did not meet the needs of some of our users. Furthermore, the recording gages have not been reliable this summer. The new observation time will simplify the observer's workload and remove the previous discrepancy we had between snowfall and snowdepth since they now represent the same time period.

### Additional Information

Additional information for November can be found at the Illinois Climate Network site that is collocated with our cooperative weather observer site. This automated station collects temperature, wind, soil temperature, evaporation, humidity, and solar radiation data. These data are usually posted a few days after the end of the month at:

<http://www.sws.uiuc.edu/warm/data/2004/November/Champaign.txt>

JRA

The daily climate statistics are available by touch-tone phone. Call 333-8890 and select menu option 1. The recording is updated daily Monday through Friday by 8:00 a.m. For this and other climate data, visit the State Climatologist web site at <http://www.sws.uiuc.edu/atmos/statecli/>
